MD Anderson Survivorship – Acute Myelogenous Leukemia (AML)

Page 1 of 4

Disclaimer: This algorithm has been developed for MD Anderson using a multidisciplinary approach considering circumstances particular to MD Anderson's specific patient population, services and structure, and clinical information. This is not intended to replace the independent medical or professional judgment of physicians or other health care providers in the context of individual clinical circumstances to determine a patient's care.

¹Consider use of Vanderbilt's ABCDE's approach to cardiovascular health

ACIP = Advisory Committee on Immunization Practices

¹See Physical Activity, Nutrition, and Tobacco Cessation algorithms; ongoing reassessment of lifestyle risks should be a part of routine clinical practice

² Includes breast, cervical (if appropriate), colorectal, liver, lung, pancreatic, prostate and skin cancer screening

³Based on Centers for Disease Control and Prevention (CDC) guidelines

⁴ Adults age 50 years and older with a history of chickenpox or shingles

DEVELOPMENT CREDITS

This survivorship consensus algorithm is based on majority expert opinion of the Leukemia Survivorship work group at the University of Texas MD Anderson Cancer Center. It was developed using a multidisciplinary approach that included input from the following:

Ella Ariza Heredia, MD (Infectious Diseases)
Naval Daver, MD (Leukemia)
Alessandra Ferrajoli, MD (Leukemia)
Katherine Gilmore, MHP (Cancer Survivorship)
Tapan Kadia, MD (Leukemia)
Thoa Kazantsev, BSN, RN, OCN
Nicholas J. Short, MD (Leukemia)
